

SEALPRO GLASS SEALER

SealPro is the result of years of steady scientific advancement that will forever change the way you look at glass. This super hydrophobic coating fills in the microscopic pores in glass and creates a chemical bond at the molecular level. The resulting barrier is so smooth and so slick that soap scum and hard water deposits cannot penetrate it.

SealPro works much like non-stick cookware. The surface can still get dirty, but clean up is much easier. This one time application means keeping the shower glass free of unsightly stains will be no problem. No more hassle. No more fuss.

Concerned about the environment? SealPro is an eco-friendly product free of caustic chemicals and carcinogens. Imagine not buying harsh cleaning agents again, only to watch them go down the drain.

Each shower enclosure treated with SealPro has a decal on the door with directions on how to register online for the Lifetime Warranty. Using SealPro will keep the shower new for years to come.
